SPECIAL CONDITIONS

1. Qualifying low-income individually metered residential customers are eligible for credits as shown on Schedule CAP.
2. All bills are subject to the following tariff schedules: **Schedule UF** (CPUC reimbursement fee) and applicable surcharges and surcredits on **Schedule RSF** (Rate Support Fund), **Schedule CAP** (Customer Assistance Program), and **Schedule AS** (Additional Surcharges and Surcredits).
3. **Fire sprinkler rate:** A single-family residence with a meter size that has a “fire sprinkler” rate (listed above) is eligible for that rate if: (a) the customer is paying for service where a residential fire sprinkler system is required/requested to be installed by local fire or building codes; (b) a smaller meter would be large enough to provide adequate service in the absence of the additional demand needed to supply water to the system; (c) the sprinkler system is served through the meter providing residential water service; and (d) the customer requests the “fire sprinkler” rate. The Company may seek verification that the above criteria are met. This service will be considered a general metered service, and not a fire service, so the rules and conditions for general metered service shall apply. The new fire sprinkler rate for 1-inch meters is listed above. The fire sprinkler rate for 2-inch meters is also listed above, and continues to be the equivalent of the 5/8 x 3/4-inch meter charge plus a 50% surcharge.
4. **Temporary Surcharge to Recover Chromium-6 Removal Costs:** Customers will receive a surcharge of \$0.2306 per one CCF (approximately 748 gallons) of water used for a period of 12-months starting October 1, 2024. In three areas of the Salinas Valley Region, drinking water from groundwater sources is now treated to remove the contaminant, chromium-6, long-term exposure to which is believed to be harmful to public health.
